

## HR Analytics Capability and Business Alignment Survey Results

HR Metrics recently conducted a survey titled "HR Analytics Capability and Business Alignment: The survey consisted of 9 key questions around the human capital analytics. The objective of the survey was to understand existing trends on HR metrics with respect to new standards on HR data disclosure ISO 30414.

81 respondents including CEOs, CHROs and senior HR executives, mainly from the corporate sector, attempted this survey. Survey findings provide good insight on the baseline and desired state for the organizations. Below is an infographic of survey questions and response findings.
